Privileged Access Management
WALLIX Bastion Managed Services

Secure Your Privileged Access with True Peace of Mind!

74% of data breaches can be traced to the loss or theft of privileged credentials, making oversight of privileged access to sensitive resources more critical than ever. Yet, the cybersecurity industry is predicting a shortage of 1.8 million unfilled jobs in the coming years, a concern for many companies which will significantly impact their security. This lack of resources can increase the risk of vulnerabilities across all sectors of activity, regardless of company size.

A Comprehensive Service for Simplified Security

WALLIX Bastion Managed Services (BMS) enables you to host the WALLIX Bastion and rely on WALLIX's expert teams to manage the ongoing maintenance and administration of your IT solution.

1. Choose the hosting infrastructure
• On public clouds (AWS, Microsoft Azure, OVH, GCP,…)
• On-premise

2. Leave it to WALLIX experts
• Set up and configuration
• Maintenance
• Upgrades
• Monitoring
• Provisioning
• Incident response

3. Receive monthly reporting
• WALLIX Bastion availability
• Access Manager availability
• Number of devices, users, tickets and incidents
• Tasks carried out or planned
• Monthly Reviews: Monthly reports and next steps
