Identity and Access Security / IDaaS
WALLIX Trustelem (MFA & SSO)

Unify, Secure and Simplify Workforce Access to Applications

Digital transformation has changed the way we think about identity. With competing priorities of efficiency, productivity, and security to balance across a wide array of in-house and in-the-cloud applications, IT teams have a bigger task than ever when it comes to accurately identifying who is accessing corporate systems, and facilitating secure, efficient access to keep business moving. **WALLIX Trustelem IDaaS** tackles the challenges – and risks – posed by employees and contractors connecting to corporate resources remotely.

Features & Characteristics

Contextual Multi-Factor Authentication (MFA)
• Protect against credential theft thanks to multiple forms of authentication to secure your entire enterprise.
• Secure authentication according to usage and the type of application used.
• Silent authentication.

User Provisioning & Life Cycle Management
• User onboarding, grant and revoke access at every stage of the employee lifecycle.
• Self-service portal for simplified management and automatic access to applications (authentication workflow).
• Monitoring and reporting to support compliance audits and forensics investigations.
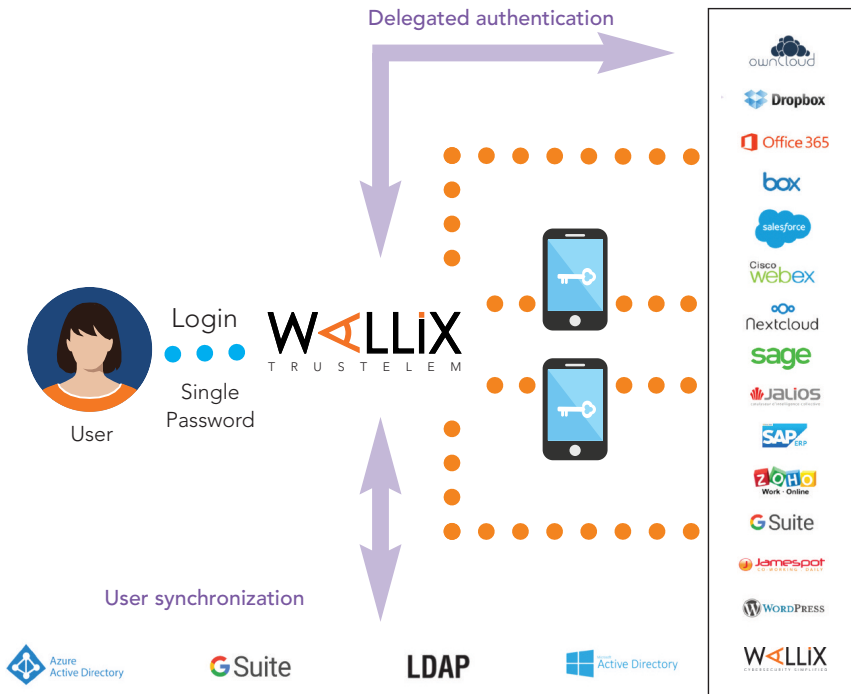

Single Sign-On (SSO)
• Users enter one set of credentials in one place and eliminate password complexity.
• Secure access to applications from anywhere (on-site or on-the-go).
• Seamless connection with pre-integrated apps via the WALLIX library (all web resources – legacy, SaaS, custom apps…).
• Federate identities from on-premises and cloud-based directories without any hassle.

Technical Characteristics

> **Silent Authentication:**
  • Kerberos
> **Authentication methods:**
  • Password (Active Directory, LDAP, WALLIX Trustelem)
  • Integrated Windows authentication
  • X509 authentication
> **Multi-Factor Authentication Methods (MFA):**
  • WALLIX Trustelem Authenticator (mobile applications with alert)
  • OTP by Text Message
  • Security Key FIDO
> **Single Sign-On for Applications:**
  • SAML, OpenID Connect, OAuth2.0
> **Federation of On-Premises Applications:**
  • LDAP & Radius connectors
> **Native Integration of Directories:**
  • Active Directory, LDAP, Azure AD, G Suite Directory
> **Self-Service Portal for Users:**
  • MFA authentication method recording
  • Password reset in Self-Service (SSPR) for Active Directory
> **Pre-Integrated Applications / Adaptation to different environments:**
  • WALLIX Bastion, Access Manager, Office 365, G Suite, Salesforce, Dropbox, Wordpress… compatible with all market standard applications
> **Traceability:**
  • Complete logging and auditability of access and authorizations
> **Extension:**
  • API and script publication to connect the platform to client environments
