Certified Training Courses

# WALLIX ACADEMY

## CERTIFICATION COURSES

The WALLIX Academy is dedicated to training end-users and partners in using WALLIX solutions and creating and running a community of certified members of the WALLIX User Club.

WALLIX offers 3 levels of training, administrator, professional and expert, for all WALLIX customers and partners. Attending these trainings will allow your teams to master the different technical and functional aspects of WALLIX solutions

	PAM (P)	MFA (A)	EPM (E)	IDaaS (I)
Available WALLIX training courses	WALLIX Bastion	WALLIX Authenticator	WALLIX BestSafe	WALLIX Trustelem
Certification training WALLIX Certified Administrator - WCA	●			
Certification training WALLIX Certified Professional - WCP	●	●	●	●
Certification training WALLIX Certified Expert - WCE	●			
	●	●	●	

Our training courses can be:

- **In person training:** inter or intra-company, handling a maximum of 6 trainees.
- **Remote training:** we require the use of Microsoft Teams. Please check the technical requirements according to training.

Find the dates of courses on

- WALLIX CERTIFIED ADMINISTRATOR / **WCA-P**
- WALLIX CERTIFIED PROFESSIONAL / **WCP-P**
- WALLIX CERTIFIED EXPERT / **WCE-P**

# WALLIX CERTIFIED ADMINISTRATOR / **WCA-P** **PAM - BASTION**

This training is intended for engineers and technicians of WALLIX end-users and reseller partners who want to understand our WALLIX Bastion solution and to be in a position to manage it in day to day activities.

## PREREQUISITES:

The trainee should be acquainted with **SSH, RDP, proxy concepts, and Linux environments**. **Systems, networks and infrastructure skills** will enable the trainee to acquire the WALLIX Bastion more quickly. This training focuses on the administration tasks of the Bastion solution and does not deal with its installation and deployment.

## DESCRIPTION:

This **1-day technical training** allows you to understand WALLIX Bastion solution and to be in a position to manage it in day to day activities. It provides the necessary means to understand the basic concepts and functionalities for its maintenance and basic administration. It is based on an active participation of the trainee who will have the ability to interact with our experience trainer in the course of the training session. At the end of the training, the trainee will have to pass an MCQ test. **An 70% score is required to get the WALLIX Certified Administrator - Bastion(WCA-P) certification.**

## Training content:

<b>I. INTRODUCTION</b>	• Approver profile
• WALLIX & Portfolio Presentation	• Auditor profile
• PAM introduction	<b>V. EXTENDED CONFIGURATION</b>
<b>II. WALLIX BASTION SESSION MANAGER</b>	• SIEM/SNMP
• Profile	• CSV
• Global concepts	• External authentication
• Primary users with local authentication management	• Session probe
• Targets management	• Enregistrement de sessions
• Targets accounts management	• Access Manager
• Authorizations management	• Session audit from Access Manager
• Checkout policy	<b>VI. MAINTENANCE</b>
• Applications management	• Services admin/users logins
<b>III. WALLIX BASTION PASSWORD MANAGER</b>	• CLI commands
• Checkout policy configuration	• Updates/Upgrades management
• Password change policy	• Install/Uninstall a hotfix
• Other way to change target accounts password	<b>VII. SUPPORT AND TROUBLESHOOTING</b>
• Break glass scenario	• Produit and licence
<b>IV. PROFILES &amp; ROLES</b>	• Maintenance contract
• Global concepts	• WALLIX resources
• User profile	• Logs files
• Admin profile	• Customer Success Support : opening a case

# WALLIX CERTIFIED PROFESSIONAL / **WCP-P** **PAM - BASTION**

This training is intended for engineers and technicians of WALLIX end-users and reseller partners who want to master the configuration, the deployment and the administration of WALLIX Bastion solution.

## PREREQUISITES:

The trainee should be acquainted with **SSH, RDP, proxy concepts, and Linux environments**. **Systems, networks and infrastructure skills** will enable the trainee to acquire the Bastion more quickly.

## DESCRIPTION :

This **3-day technical training** allows you to discover and take control of our WALLIX Bastion solution. It provides the necessary means to understand the basic concepts and functionalities for a deployment in a classical architecture. Alternating theory and practice, it is based on an active participation of the trainee who will have to configure and administer a Bastion into a LAB platform to become completely autonomous. At the end of the training, the trainee will have to pass an MCQ test. **An 70% score is required to get the WALLIX Certified Professional - Bastion (WCP-P) certification.**

## Training content:

<b>I. Training and certification courses</b>	• Monitoring and logs
<b>II. Company and products</b>	• Configuring an email server and enabling the notifications
• WALLIX company	• Main components and services of the Bastion
• WALLIX products	<b>IV. WALLIX Session Manager</b>
• Licensing information	• Global concepts
<b>III. Installing and Handling the WALLIX Bastion</b>	• Add user/primary account (local authentication)
• Installing the WALLIX Bastion appliance	• Add a user/primary account group
• The Bastion in the infrastructure	• Add a device
• Initial configuration	• Add secondary/target account (Device account)
• First connection	• Add resource group
• Changing the admin password	• Add an authorization
• Installing the license	• Connecting to a server using RDP
• Configuring the network	• Connecting to an SSH server
• Configuring the time zone and NTP servers	• Changing the disclaimer message
• Add A Bastion administrator	• Add an application
• Backing up the configuration	• Add an SSH startup scenario
• Restoring the configuration	• Add user/primary account (external authentication)
• Backing up the bastion version	• Discovery
• Updating the Bastion version	• Add secondary/target account (Global Domain account)
• Rollback to the previous bastion version	• Import/export
• Install/uninstall a hotfix	

# WALLIX CERTIFIED PROFESSIONAL / **WCP-P**

## PAM - BASTION

<b>V. WALLIX Password Manager</b>	• CLI Commands
• Global concepts	• Retention policy
• Add a Checkout policy	• Custom profiles
• Configuring a Checkout policy on target/secondary account	<b>VII. WALLIX Access Manager</b>
• Add a password management account to the resource group	• Global concepts
• Enable the password checkout on the authorization	• Installing Access Manager as an appliance
• Password Checkout - User side	• Default configuration
• Add password change policy	• Manage organization
• Discovery	• Manage Bastions on the Access Manager
• Password change plugins	• Manage local primary users
• Enable password change on a target/secondary account	• Manage primary users with external authentication (LDAP)
• Enabling password change and Configuring password policy and password plugin on local/global domain	• Password Policy of the organizations
• Enabling password change at check-in	• Customize the template of the organizations
• Password change - administrator side	• Connecting to a server using RDP
• Break glass	• Connecting to an application
<b>VI. Profiles</b>	• Connecting to a SSH server
• Approver profile and approval workflow for password manager	• Accessing the account password
• Session audit	• Session audit from the Access Manager
• Current session	• Managing the Access Manager settings
• Session history	• Upgrading the Access Manager
• Account history	<b>VIII. WALLIX High availability</b>
• Approval history	• WALLIX Bastion HA
• Authentication History	• WALLIX HA Replication
• Connection statistics	<b>IX. WALLIX Customer Support Center</b>
• Password Manager audit	• Before opening a case
• Session recording parameters	• Opening a case
• Managing the session records	

# WALLIX CERTIFIED EXPERT / WCE-P PAM - BASTION

This training is intended for engineers of WALLIX reseller partners and end-users who want to achieve advanced deployments of the WALLIX Bastion solution.

## PREREQUISITES:

The trainee must be certified **WCP-P (WALLIX CERTIFIED PROFESSIONAL - BASTION)**. He must also be acquainted with the **GNU/Linux command line**. **Scripting knowledge** will facilitate the follow-up of this training.

## DESCRIPTION:

This **2-day technical training** introduces the advanced concepts of WALLIX solutions to achieve advanced deployments. Based on the setup of Bastion advanced configurations (active / active architecture, automatic provisioning, disaster recovery plan, etc.), training provides the knowledge and skills needed for specific and/or large-scale deployments in complex environments. At the end of the training, an MCQ test must be completed by the trainee and he must get an 70% score to get the **WALLIX Certified Expert - Bastion (WCE-P) certification**.

## Training content:

<b>I. Advanced authentications</b>	• Secure the credentials used by Autoit applications
• Bastion - LDAP/AD explicit authentication	• WABIELogin script
• Bastion - Radius Authentification explicite	<b>III. Proxies parameters</b>
• Bastion - Kerberos explicit authentication	• Global concepts
• Bastion - Kerberos transparent authentication	• RDP connection policy
• Bastion - certificate X509 transparent authentication	• RDP Proxy Global parameters
• Access Manager - LDAP explicit authentication	• RDP Proxy sesman Global parameters
• Access Manager - X509 certificate Transparent authentication	• Change the RDP proxy self-signed certificate
• Access Manager - SAML (Security assertion markup language) Explicit authentication	• SSH connection policy
<b>II. Advanced Applications</b>	• SSH Proxy Global parameters
• Reminder: Applications in WALLIX session manager	• TELNET connection policy
• Clusters	• VNC connection policy
• Autolt Scripting Language	• VNC Proxy Global parameters
• Download and install Autolt application	<b>IV. Advanced Password Manager</b>
• Write an Autolt script *.au3	• Reminder: WALLIX Password Manager
• Compile the script to generate the Autolt application *.exe	• WAAPM: WALLIX Application to Application Password Manager
• Upload the Autolt application on the server	• Bastion as External vault (from V6.1)
• Add an Autolt application on the Bastion	

# WALLIX CERTIFIED EXPERT / WCE-P

## PAM - BASTION

V. WALLIX Bastion REST API	• The Bastion REST API Response codes
• Global concept	• Browse resources using REST API
• WALLIX Bastion REST API	• ADD a resource using REST API
• Authenticate to The Bastion REST API	• Modify a resource using REST API
• Logout from the Bastion rest API	• Delete a resource using REST API
• The Bastion REST API methods	

## PAM Remote Training Courses technical prerequisites

To succeed in flowing our remote training, we require the use of Microsoft Teams.

As part of WCP and WCE training there is a WALLIX Training LABs platform that allows you to do all training LABs independently. For that, the platform includes 4 preconfigured virtual machines: Domain controller (Windows 2016), 2016 Windows server, Linux server and WALLIX Bastion.

### Minimum Hardware requirements for WCP-P and WCE-P training:

- 8GB Ram or more
- I5 Processor
- 40GB harddrive space available
- In the first step of the training we will setup this Platform.
- The admin rights in your computer is mandatory to install and configure all these tools properly.

### Prepare the lab virtual machines:

Download and Install Virtual Box

<https://www.virtualbox.org/wiki/Downloads>

- Platform package
- Virtual Box Extension Package

*Access to lab virtual machines*

*will be communicated to you when you register*

*Our training courses are accessible to people with disabilities. For more information or in case of need of a particular adaptation of the training, please contact our handicap referent at the following address:*

## WALLIX Authenticator (MFA for PAM)

This training is intended for engineers and technicians of WALLIX end-users and reseller partners who want to master the configuration, the deployment, and the administration of WALLIX Authenticator solution.

### PREREQUISITES:

The trainee should be acquainted with **Active Directory Objects, and Microsoft environments. Systems, networks, and infrastructure skills** will enable the trainee to acquire the WALLIX Authenticator more quickly.

### DESCRIPTION :

**This 1-day technical training** allows you to discover and take control of our WALLIX Authenticator solution. It provides the necessary means to understand the basic concepts and functionalities for a deployment in a classical architecture. Alternating theory and practice, it is based on an active participation of the trainee who will have to configure and administer into a LAB platform to become completely autonomous. **At the end of the training, an MCQ test must be completed by the trainee and he must get an 70% score to get the WALLIX CERTIFIED PROFESSIONAL (WCP-M).**

### Training content:

<b>I. COMPANY AND PRODUCTS</b>	• Users from Active Directory
• Introduce WALLIX & Products	<b>V. APPLICATIONS MANAGEMENT</b>
• Authenticator	• SSO Applications
<b>II. WALLIX AUTHENTICATOR SOLUTION</b>	• LDAP/Radius Applications
• Identity and Access Management	<b>VI. ACCESS MANAGEMENT</b>
• Users Access	• Access management interface
<b>III. AUTHENTICATOR MANAGEMENT INTERFACE PRESENTATION</b>	• Access rules
• Three main steps	<b>VII. ADVANCED USER EXPERIENCE</b>
• Presentation of the different tabs	• Logs
<b>IV. USERS MANAGEMENT</b>	• Alertes
• Users created in WALLIX Authenticator	• Sessions
• Users from d'Azure AD	• Tableaux de bord
• Users from de GSuite

# Endpoint Privilege Management

## WALLIX Bestsafe

- WALLIX CERTIFIED PROFESSIONAL / **WCP-E**

# WALLIX CERTIFIED PROFESSIONAL / **WCP-E** **EPM - BESTSAFE**

This training is intended for engineers and technicians of WALLIX end-users and reseller partners who want to master the configuration, the deployment and the administration of WALLIX BestSafe solution.

## PREREQUISITES:

The trainee should be acquainted with **Active Directory Objects, MMC Tools, Microsoft environments. Systems, networks and infrastructure skills** will enable the trainee to acquire the WALLIX BestSafe more quickly.

## DESCRIPTION:

This **2-days technical training** allows you to discover and take control of our WALLIX BestSafe solution. It provides the necessary means to understand the basic concepts and functionalities for a deployment in a classical architecture. Alternating theory and practice, it is based on an active participation of the trainee who will have to configure and administer into a LAB platform to become completely autonomous. At the end of the training, the trainee will have to pass an MCQ test. **An 70% score is required to get the WALLIX BestSafe Certified Professional (WCP-E) certification.**

## Program:

<b>I. COMPANY AND PRODUCTS</b>	• Rules Flags
• Introduce WALLIX & Products	• Rules Inheritance
• How can BestSafe help you to reduce your surface attack?	<b>V. WALLIX BESTSAFE EXTENDED CONFIGURATION</b>
• Active Directory Main Concepts Reminders	• General Tab
• Windows Process Security Context Reminders	• End Point Security
<b>II. WALLIX BESTSAFE SOLUTION</b>	• Emergency Actions
• POLP (Principle of Least Privilege)	• Analytics
• WALLIX BestSafe Architecture	• Forbidden Rules
• WALLIX BestSafe Networking	• Rules Admins
<b>III. WALLIX BESTSAFE INSTALLATION</b>	<b>VI. MAINTENANCE &amp; SUPPORT</b>
• AD requirements and changes	• BestSafe Logs Analysis
• Install / Reinstall / Update Admin Console	• Rules Verifying
• Install / Reinstall / Update Client	<b>VII. WALLIX BESTSAFE SECURITY RULES &amp; RANSOMWARE RULES CONFIGURATION</b>
• License Activation	• Local privileged group membership management – Security Rules
<b>IV. WALLIX BESTSAFE PRIVILEGE RULES CONFIGURATION</b>	• Enabling Security Rules
• Manage windows process security context – Privilege Rules	• Managing Security Rules
• Privilege Rules - Restricted / Blocked / Administrator / Command Line / Filtering by Groups / Just in Time - Rules Validity / Rules Filtering by OS	• Ransomware Rules
• Privileges Management / Parent Processes	• Local Accounts Password Management

Our training courses are accessible to people with disabilities. For more information or in case of need of a particular adaptation of the training, please contact our handicap referent at the following address: [academy@wallix.com](mailto:academy@wallix.com)

# IDaaS

# WALLIX Trustelem

• WALLIX CERTIFIED PROFESSIONAL / **WCP-I**

# WALLIX CERTIFIED PROFESSIONAL / WCP-I IDaaS - TRUSTELEM

This training is intended for engineers and technicians of WALLIX end-users and reseller partners who want to master the configuration, the deployment and the administration of WALLIX Trustelem solution.

## PREREQUISITES:

The trainee should be acquainted with **Active Directory Objects, Microsoft environments. Systems, networks and infrastructure skills** will enable the trainee to acquire the WALLIX Trustelem more quickly.

## DESCRIPTION:

This 1-day technical training allows you to discover and take control of our WALLIX Trustelem solution. It provides the necessary means to understand the basic concepts and functionalities for a deployment in a classical architecture. Alternating theory and practice, it is based on an active participation of the trainee who will have to configure and administer into a LAB platform to become completely autonomous. At the end of the training, the trainee will have to pass an MCQ test. **An 70% score is required to get the WALLIX Trustelem Certified Professional (WCP-I) certification.**

## Program:

I. GENERALITIES	VI. WALLIX TRUSTELEM ACCESS MANAGEMENT
• Introduce WALLIX & Products	• Access Management Interface
• Introduce Trustelem	• Access Rules Definition
II. WALLIX TRUSTELEM SOLUTION	VII. WALLIX TRUSTELEM ADVANCED USER EXPERIENCE
• Identity and access management	• Integrated Windows Authentication
• User Accesses	• Authentication with Certificates
III. WALLIX TRUSTELEM ADMINISTRATION INTERFACE PRESENTATION	• Reset password Active Directory by User
• Three major steps	VIII. WALLIX TRUSTELEM FOLLOW-UP OPERATIONS
• Presentation of the different tabs	• Log
IV. WALLIX TRUSTELEM USERS MANAGEMENT	• Alerts
• Users created on WALLIX Trustelem	• Sessions
• Users from Azure AD	• Dashboard
• Users from GSuite	IX. QUICK INTRODUCTION TO APIS
• Users from Active Directory	• Presentation of the main functions
V. WALLIX TRUSTELEM APPLICATIONS MANAGEMENT	X. PLANNING AN SSO PROJECT
• Generic Models	• Presentation of the main steps to follow
• Pre-integrated Applications	

Our training courses are accessible to people with disabilities. For more information or in case of need of a particular adaptation of the training, please contact our handicap referent at the following address: [academy@wallix.com](mailto:academy@wallix.com)

## about WALLIX

A software company providing cybersecurity solutions, WALLIX Group is a European specialist in privileged account governance. In response to recent regulatory change (NIS/GDPR in Europe and OVIs in France) and the cyber security threats affecting all companies today, Bastion helps users protect their critical IT assets: data, servers, terminals and connected objects.
