

## WALLIX and NOZOMI deliver unparalleled security and visibility into OT networks

**NOZOMI and WALLIX provide together the simplicity and power of their solutions to deliver unparalleled security and visibility into OT networks.** Secure and traceable remote access, combined with threat discovery, analysis and assessment in industrial environments provides a unique forensic analysis experience in case of compromise.

Discover OT assets, assess threats and secure remote access with a global visibility, that's the promises of the WALLIX |NOZOMI partnership to ensure a secured and seamless production !

### Solution overview

- Provide easier and faster WALLIX Bastion deployment in OT, thanks to passive asset discovery feature from NOZOMI Guardian.
- Deliver reliable, and highly secure remote access to OT environments.
- Threat discovery, analysis and assessment in industrial environment.

### Solution Integration Overview

- Use NOZOMI Guardian to request devices data.
- Import and sort assets based on port number into WALLIX Bastion.
- Onboard or update assets list into WALLIX Bastion host.

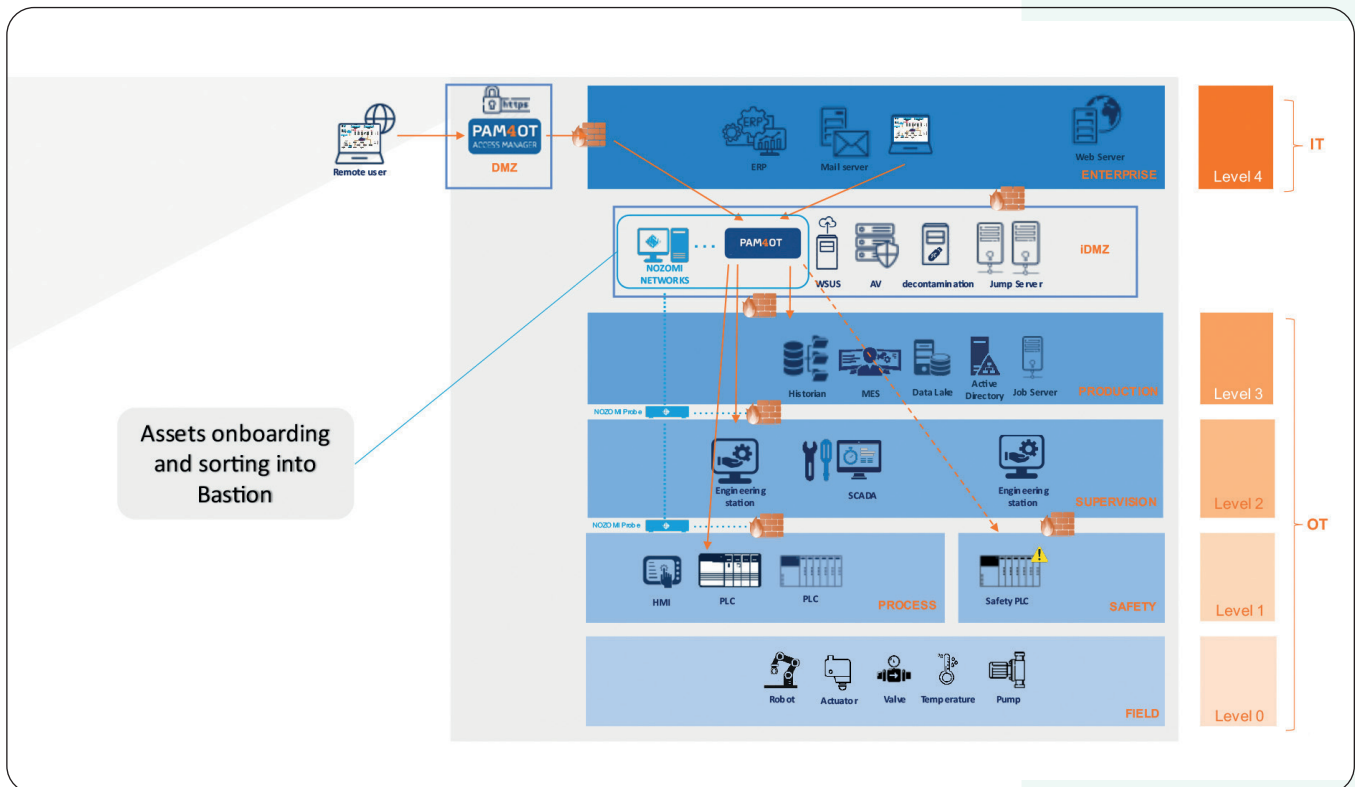

### Benefits

- > Automatically track your ICS, OT and IoT/IIoT assets.
- > Mitigate risks caused by unauthorized or malicious access.
- > Apply granular access policies for internal and external users at both the asset level and the connection protocol level. Apply Just-in-Time (JIT) User Provisioning.
- > Gain complete visibility of every activity originating from a remote connection when needed for maintenance or other purposes: who is doing what and when, including monitoring with audit logs.
- > Ensure compliance thanks to session traceability and recording to achieve more effective governance.
- > Allows companies to have full control of every type of asset (physical and data) by supporting most protocols used in the production environment.

## INTEGRATION KEY BENEFITS

- Reduce build workload on a PAM4OT project.
- Enable discovery of OT networks without production downtime risks.
- Sort and update the assets list for seamless onboarding into PAM4OT.

## About WALLIX

A software company providing cybersecurity solutions, WALLIX is the European specialist in Identity and Access Security Solutions. WALLIX PAM, the unified access and privilege management solution, enables companies to respond to today's data protection challenges. It guarantees detection of and resilience to cyberattacks, which enables business continuity. The solution also ensures compliance with regulatory requirements regarding access to IT infrastructures and critical data.

## About Nozomi Networks

Nozomi Networks is accelerating the pace of digital transformation by pioneering innovation for industrial cybersecurity and operational control. Leading the industry, we make it possible to tackle escalating cyber risks to operational networks. In a single solution, Nozomi Networks delivers OT visibility, threat detection and insight to thousands of the largest critical infrastructure, energy, manufacturing, mining, transportation and other industrial sites around the world.

Partner Product:  
- Nozomi Guardian

WALLIX Product:  
- WALLIX PAM4OT / WALLIX PAM
